A Letter from Principal Wardle

Parents,

As we start the new semester, and a new year, we are in the time of New Year's resolutions. I struggle to keep mine every year! A recent study by the University of Scranton found some interesting statistics on New Year's resolutions:

- 2 of every 5 people in the United States make a New Year's resolution
- After only 1 week, only 3/4 were still keeping their resolution
- After one month, that number dropped to 2/3 still going strong
- After 3 months, 50% of people that had made New Year's resolutions were still making that positive change in their lives

While these are not the best statistics, here is the most interesting, and positive one: Those of us who at least make a New Year's resolution are 10 times more likely to make the positive change we want than those that want to make a change,

but did not make a resolution. It's worth it to make a resolution!

As we start this new semester, and new calendar year, I hope you are able to spend some time with your son or daughter to write down a resolution in regards to their academic, social, emotional, and spiritual lives. Being 10 times more likely to make these changes is a big deal, and worth the effort. While you're at it, write some down for yourselves. I will too, this year, and hope to make it further than ever before.

Have a wonderful 2nd semester, and 2019!

Go Bison,

Jeff Wardle
